

# Equitable Evaluation Framework

*Making sure we value stories alongside numbers, relationships alongside results, and continuous learning over simply proving success.*

## LAB Learning Action Buffet

### > Principle 1:

#### Evaluation Should Help Create Equity

Evaluation should help make opportunities, resources, and outcomes fairer for everyone; it isn't just about collecting information.

### > Principle 2:

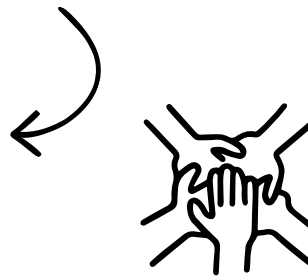

#### The Process Should Match Our Values

How we evaluate matters just as much as what we evaluate. People closest to the work should help shape the process.

### > Principle 3:

#### Ask Bigger Questions

Instead of only asking "Did this program work?", ask *why* things happened and what systems or barriers affect people.

## A Simple Guide for Community

Evaluation isn't just about measuring success - its about learning, improving, and making sure everyone has a voice. The Equitable Evaluation Framework (EEF) encourages us to ask better questions, include different perspectives, and create positive change together.

*This was adapted from the Equitable Evaluation Framework as created by the Equitable Evaluation Initiative 2023.*
